## California Has Too Much Solar Power. That Might be Good...

California set two renewable energy records last week: the most solar power ever flowing on the state's main electric grid, and the most solar power ever taken offline because it wasn't needed. There's no contradiction: As California utilities...

Access the tools, knowledge, and network you need to close solar deals, increase your bottom line, and grow your solar business. The [Solar Executive MBA](#) is technical, rigorous, and challenging. It's the most intense six-week course you'll ever find but also the most valuable. We developed it for leaders who are responsible for the financial details that drive solar projects.

## These Cities in Red and Blue States are Accelerating...

It was the two-year anniversary of President Trump's announcement to withdraw from the Paris Climate Agreement on June 1. Yet cities across the country are demonstrating leadership in the face of uncertainty about the administration making the...
