The Inflation Reduction Act (IRA) is the largest climate bill in U.S. history. A main policy focus of the IRA is supporting tax credits and rebates for clean energy, electric vehicles and efficiency updates. Below are some highlights of how this bill can benefit you and/or your business.

All of these policy incentives are projected to increase the deployment of clean energy, electric vehicles, and energy efficiency investments. This is an unprecedented level of policy support from the U.S. federal government.

Please note that not all households are eligible for all credits and rebates. Consult with state-specific program specialists, tax accountants and energy professionals about potential savings for your household.

For more information, please see the "By the Numbers: The Inflation Reduction Act" press release from the White House and the "What the Inflation Reduction Act Does for Green Energy" article by PBS.
